EDUCATION

BTech, National Institute of Technology, Calicut **2021 - 2025**
Electrical and Electronics Engineering - ***CGPA - 7.95****

Kuriakose Elias English Medium School, Mannanam **2019 - 2021**
Board of Higher Secondary Examinations - Computer Science - ***Percentage - 99%***

COURSEWORK

- Data Structures
- OOPS Concept
- Analog Electronics
- Logic Design
- Microprocessors and Microcontrollers

PROJECTS

Stopwatch using PIC18F452 Microcontroller (C Programming)

- Developed a functional stopwatch using PIC18F452 microcontroller and C programming, utilizing built-in timers, interrupts, and I/O ports for accurate timing.
- Implemented a user-friendly interface with a 7 segment display and buttons to start, stop, and reset the stopwatch.

Sound Analysis using MATLAB and Arduino

* Designed and implemented a system using MATLAB, Arduino, and a sound sensor module to analyze and record sound input.
* Used MATLAB for data processing and analysis, including plotting the time domain representation and frequency domain representation of the recorded sound.

TECHNICAL SKILLS

Languages: C, C++, PIC18F Assembly, Dart(Beginner), Matlab(Beginner)
Developer Tools: VS Code, Android Studio(Beginner)
Technologies/Frameworks: Flutter(Beginner)

CERTIFICATIONS

- Object Oriented Data Structures - Coursera
